

PRRSUM announces...

The Inaugural Upper Midwest Stream Restoration Symposium

{ Feb. 21-24, 2010 }
{ La Crosse, WI }

The inaugural Upper Midwest Stream Restoration Symposium will bring together **leading** national and regional stream restoration practitioners for presentations and discussions on important stream and **river restoration issues**.

Agency employees

Researchers

Students

Biologists

Engineers

Geomorphologists

Naturalists

Fisheries

Policy makers

Symposium topics will include restoration design, ecology, monitoring, dam removal, numerical modeling, new research, and related topics of interest.

This symposium is designed to **foster exchange**, conversation, and **new collaborations** among restoration practitioners in the Upper Midwest. Registration will include symposium attendance, housing, and meals during the conference, and is limited to 120 participants.

This symposium is organized by the National Center for Earth-surface Dynamics, an NSF sponsored Science and Technology Center, and the St. Anthony Falls Laboratory, which is affiliated with the Institute of Technology, and the departments of Civil Engineering; Geology and Geophysics; and Ecology, Evolution and Behavior at the University of Minnesota.
